# ZUMA

Zuma is produced using once fired technology, reducing the impact of the manufacture on our environment. A fully vitrified body and rolled edges, produces a strong and durable masterpiece.

In a range of exciting reactive colours featuring variance in colour and glaze, every piece appears to be hand thrown making each piece have its unique DNA, which enables a creative canvas for any chef.

All colours can be introduced to existing tabletop, creating a harmonious blend of accent pieces. Introducing warmth with an innovative style, engaging but different, a natural choice for your tableware.

ZUMA

**NEW**  
CLOUD

Zuma provides endless possibilities to mix and match your tabletop combinations with your existing pieces, creating a harmonious blend of accent pieces. Introducing warmth with an innovative style, engaging but different, a natural choice for your tableware.

# Luzerne

With a sound knowledge of ceramics, artisans have proudly developed Luzerne New Bone... exhibiting all features of traditional bone without the use of bone ash.

Luzerne New Bone is stronger than traditional bone, has a high tolerance of temperature variance, suitable in all commercial environments. Suitable for use in the oven and microwave and is dishwasher safe.

Luzerne New Bone is technically crafted and designed to enhance the dining experience.

## A GLASS THAT ALLOWS THE 'WINE TO STAR'

In our quest to develop high performance glassware we drew inspiration from our partnership with wine artisans.

We are proud to introduce  
"RG" Ryner Glass.

Ryner Glass technology ensures brilliance and commitment to quality.

The glass detail influences the complete sensory wine experience of drinking.

The nuance and delivery of wine is totally dependent on glassware.

All our glasses are produced to a high standard of quality, design, durability and are dishwasher safe.

In addition to our wide variety of suites our glasses are sturdy yet fine, offering a glass for every taste and occasion.

Extremely strong crystalline glasses that incorporates impact and thermal shock resistance. Clarity, brightness and transparency combine to make Carnivale a unique offering of glassware.

## Care & Maintenance Instructions

- Whilst resin is highly durable and shatter proof. It should be handled with care. Food safe and FDA approved
- Dishwasher safe
- Not suitable for use in conventional ovens or microwaves
- Do not use under heat lamps or on the stove top
- A frosty film may appear on the resin after washing over time. This is easily removed.
- Use a small amount of cooking oil, rub with a soft cloth and rinse. The resin will return to it's original luster
- Light scratches and scuff marks are also easy to remove. Use a mild abrasive scouring pad and lightly rub the scratches with the pad. A little soap and water or cooking oil on the pad further enhances the appearance.
- Never use sharp or serrated knives on the resin. Scouring from sharp instruments can not be removed.

Introducing Kenny Mack Designs, a unique range of tabletop items that create a luxurious mood to your environments. Pieces are designed with textural elements that emulate wood, glass, stone, shells and metal. Kenny Mack Designs are all food and dishwasher safe. They are primarily made of resin, a diverse and durable material. A welcome addition to our world class range of the latest in food presentation solutions.

VIDACASA™ Buffetware keeps the food plate surface at 4°C (32°F) for up to 6 hours, without the use of external power. This innovative cooling feature assures delicate perishables like fresh seafood, Japanese raw food, cold cuts, salads and even desserts be served freshly in all hotels, restaurants and catering outlets.

iThermo® technology absorbs cooling power during state transformation and releases cold thermal power for long hours. With the use of the iThermo® Cell, VIDACASA™ Buffetware can keep it's surface at a low temperature for up to 6 hours, without using wet ice, dry ice or electricity supply.

The use of the iThermo® Cell is easy. Simply store it in any freezer overnight or until it becomes a solid, place into the thermal base, and watch the magic cooling power!

The entire VIDACASA™ Buffetware collection is eco-friendly and food safe, while the iThermo® Cell can be reused, saving huge operation costs and providing green environment benefits to the earth.

VIDACASA™ BUFFETWARE IS COMPOSED OF THREE PARTS:

- 1** top porcelain food plate
- 2** the innovative reusable iThermo® Cell
- 3** the polyurethane thermal base

VIDACASA™ Buffetware keeps the food plate surface at 4°C (32°F) for up to 6 hours, without the use of external power. This innovative cooling feature assures delicate perishables like fresh seafood, Japanese raw food, cold cuts, salads and even desserts are served freshly in hotels, restaurants and catering outlets.

VIDACASA™ Buffetware keeps the food plate surface at 4°C (32°F) for up to 6 hours, without the use of external power. This innovative cooling feature assures delicate perishables like fresh seafood, Japanese raw food, cold cuts, salads and even desserts are served freshly in hotels, restaurants and catering outlets.

iThermo® technology absorbs cooling power during freezing and releases cold thermal power for many hours. With the use of the iThermo® Cell, VIDACASA™ Buffetware can keep its surface at a low temperature for up to 6 hours, without using wet ice, dry ice or electricity supply.

Build your own combinations with these compact units which are simple to set up, cordless and dishwasher friendly.

The entire VIDACASA™ Buffetware collection is eco-friendly and food safe. The iThermo® Cell can be reused, saving operating costs and providing green environment benefits to the earth.

VIDACASA™ BUFFETWARE IS COMPOSED OF THREE PARTS:

- 1** top porcelain food plate
- 2** the innovative reusable iThermo® Cell
- 3** the polyurethane thermal base

Each Vidacasa display comprises of a highly insulating polyuethane base with a compartment to snugly hold an iThermo cell. The flat deisgn ensures evenly distributed temperature, keeping food fresh.
