# INTRODUCTION

---

Tomkin is an established brand, and a hospitality market leader. We offer a broad range of glassware that is timeless, iconic and innovative.

In this catalogue you will find a selection of modern, classic, casual and elegant designs to suit the latest trends in food and dining presentation. In addition to this our broad range includes polycarbonate drinkware to suit both indoor and outdoor environments.

Key descriptors are included on each page to identify and highlight the properties of each glass. This guide will help you to select the products that best suit your needs.

Our dedicated sales team are available to answer further queries. Contact numbers for each state are listed on the back page of this catalogue.

Perry Rabin, Director.

## ◆ CRYSTAL GLASS

Crystal glass delivers exceptional clarity and break resistance. It is perfect for use in dishwashers whilst still capable of preserving its original aesthetic characteristics. It is particularly suited to those seeking an elegant product for the table.

## ◆ TOUGHENED

Suited to the most demanding consumers and food service professionals, toughened glass rapidly and safely moves from hot to cold temperatures. The molecular construction of the glass also prevents it from breaking into large shards of glass, if it does break due to strong shock it will break into many small pieces avoiding the risk of being cut.

## ◆ PULLED STEM

A Pulled stem is obtained from a single piece of glass and guarantees increased durability. A seamless transition from bowl to stem allows for even glass distribution and thin walls throughout the glass.

## ◆ REDUCED THICKNESS

Reduced thickness is applied to ensure optimum glass distribution throughout the body, the laser-cutting process used to achieve reduced thickness also guarantees an especially fine lip on the glass.

## ◆ STACKABLE

The design, construction and durability of this glass allows for stackability. A well-balanced stackable glass reduces the risk of breakage by allowing users to stack glasses on shelves and transport with ease across service areas.

# GLASS RACK SIZING GUIDE & RULER

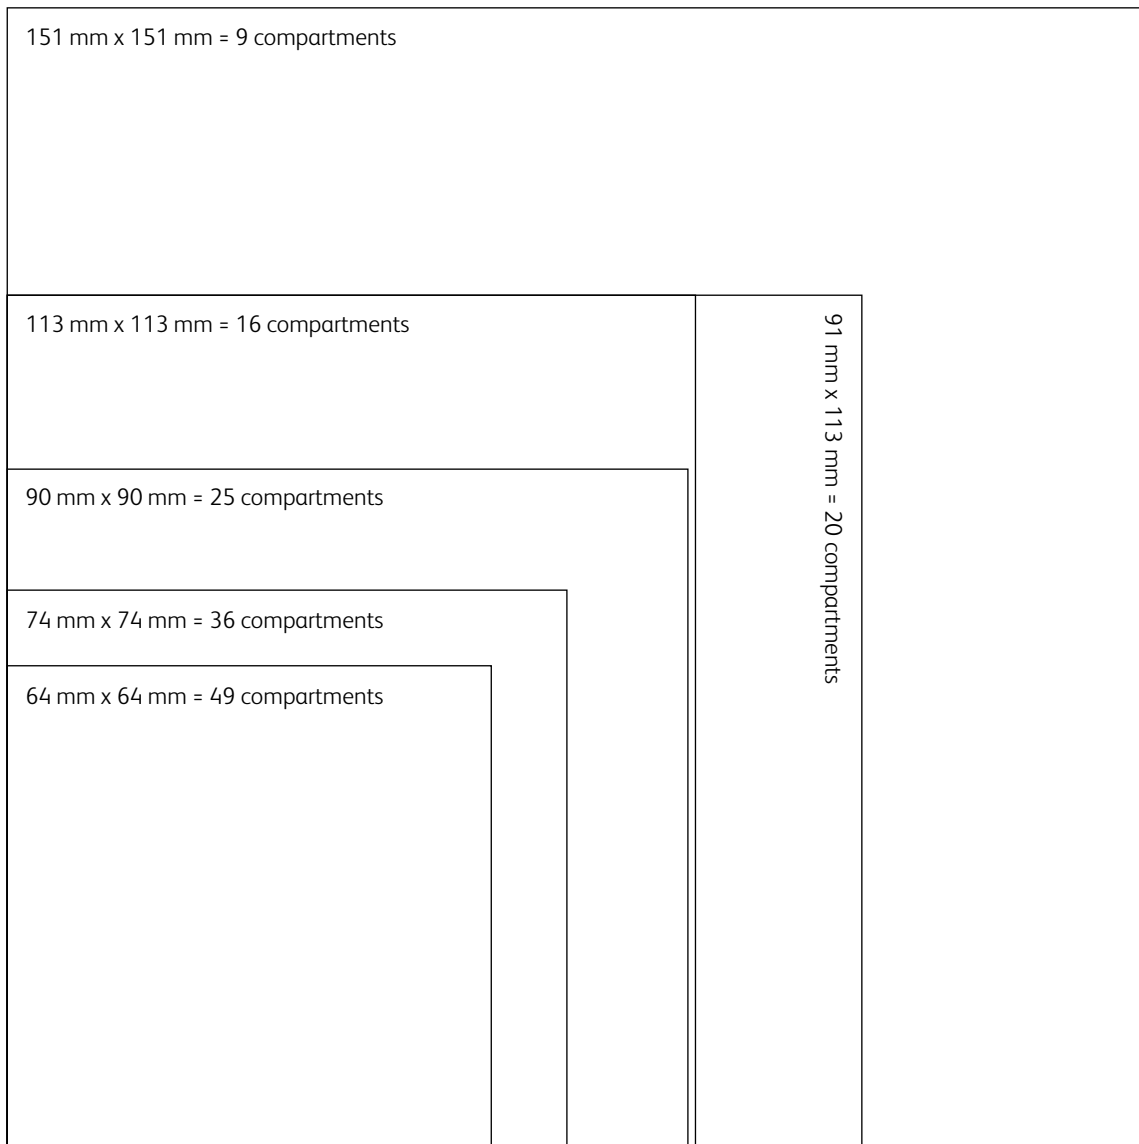

## How to determine the correct compartment size for your glass:

- 1) Place the rim of your glass facedown on the compartment sizing chart and align the glass to the lower left hand corner of the guide.
- 2) From a top view note which compartment the diameter of the glass fits within.
- 3) The rack compartment size is determined by the smallest compartment on the guide that the outer diameter of the glass rim, foot or bowl fits within (please note that a glass is too small for a compartment if the outer diameter touches or falls outside of the compartment guide).

## Determine the correct rack base and number extensions for your glass height:

- 1) Place either the rim or the base of your glass against the base of the ruler (0 mm).
- 2) Note where the other end of the glass reaches to on the ruler.
- 3) The required glass rack base and number of extenders is determined by the line above the full height of the glass.

*Please note that this reference chart is to be used as a guide only. For final rack selections please ensure that your glass fits into the rack prior to order. Please contact a Tomkin representative to assist with your final selection.*
