ACE FILTERS INTERNATIONAL

Liquid filters

- MEC stainless steel and polypropylene filter pressure vessels (4" to 48" bag and cartridge types)
- Micron rated felt bags (4" and 7")
- Micron rated mesh bags and sheets
- Fry oil filter bags/cones etc
- Milk filter socks/tubes/discs
- Food processors media
- Steel cutting filter media
- Hydroponic and spawning filters

Milk filters

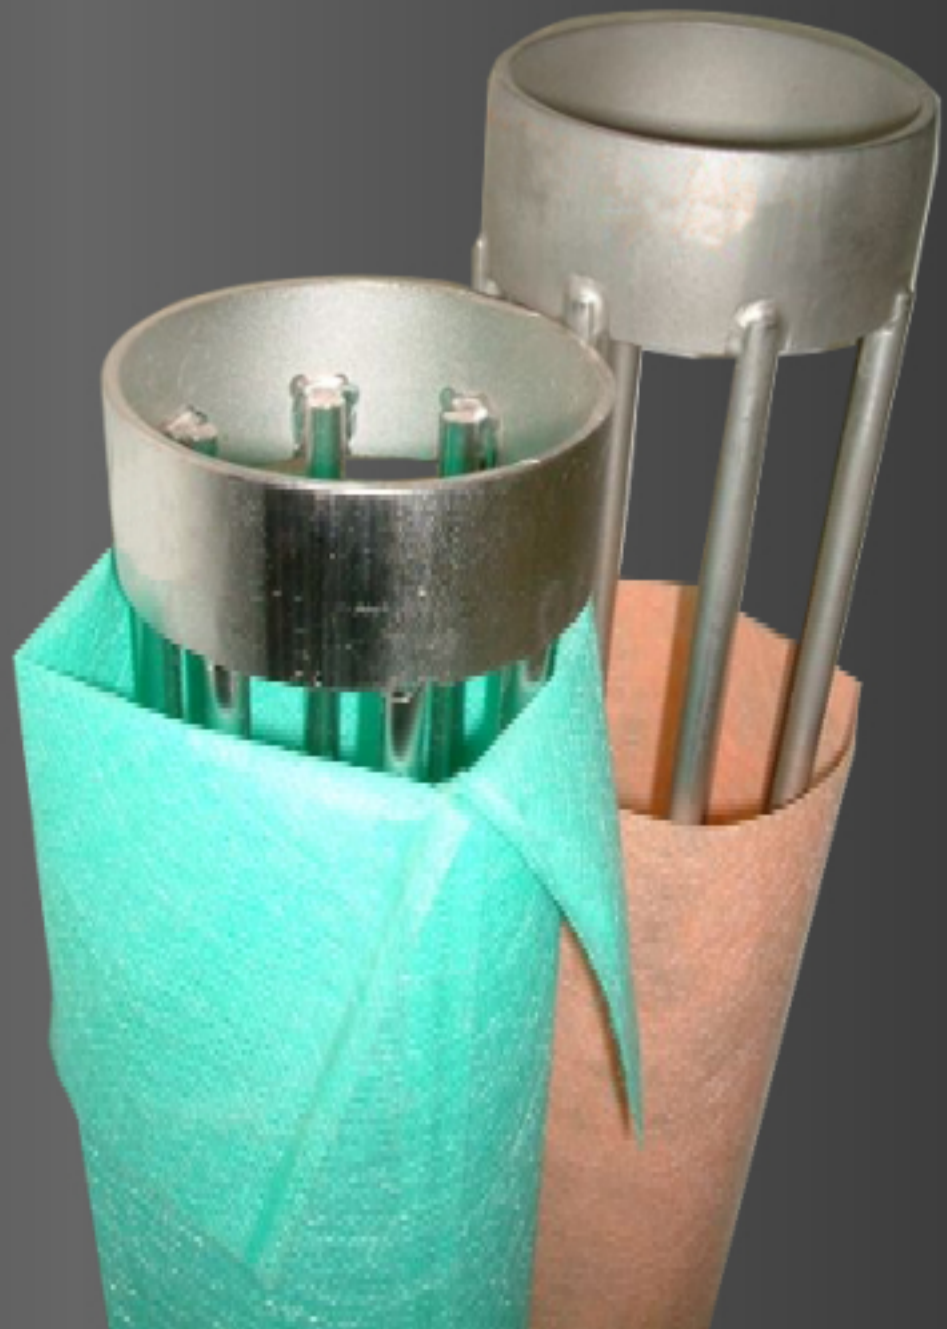

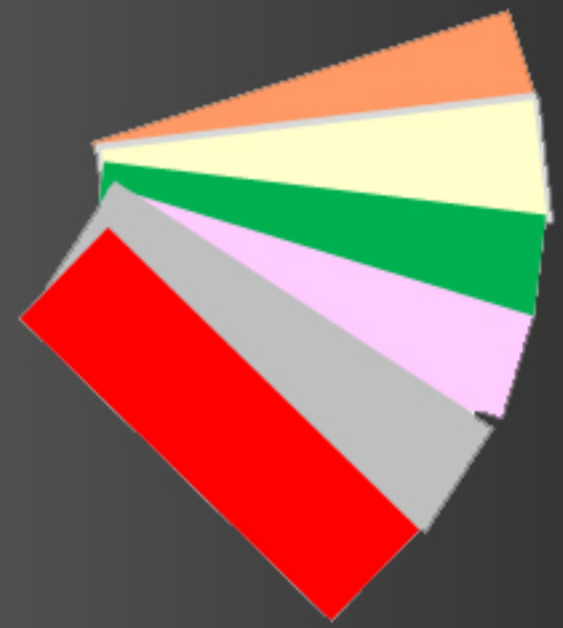

ACE can make milk filters to any colour you wish. For example white, green, red, grey, black, pink and peach.

We've designed a better milk filter! Why settle for white when you can have colour?

Colours allow you to see mastitis.

Available in a wide range of sizes to suit all milking machines in:

- Packets of 100
- 125 l/m Easy-Roll dispensing packs
- Australian-made
- High flow rate: 80 micron
- New super-strong
- 80gsm material resists ripping and tearing
- Glued socks and tubes or continuous Easy Roll®
- Unique superbond trilobal non-woven for improved filtering
- We can also add your company logo to the filters

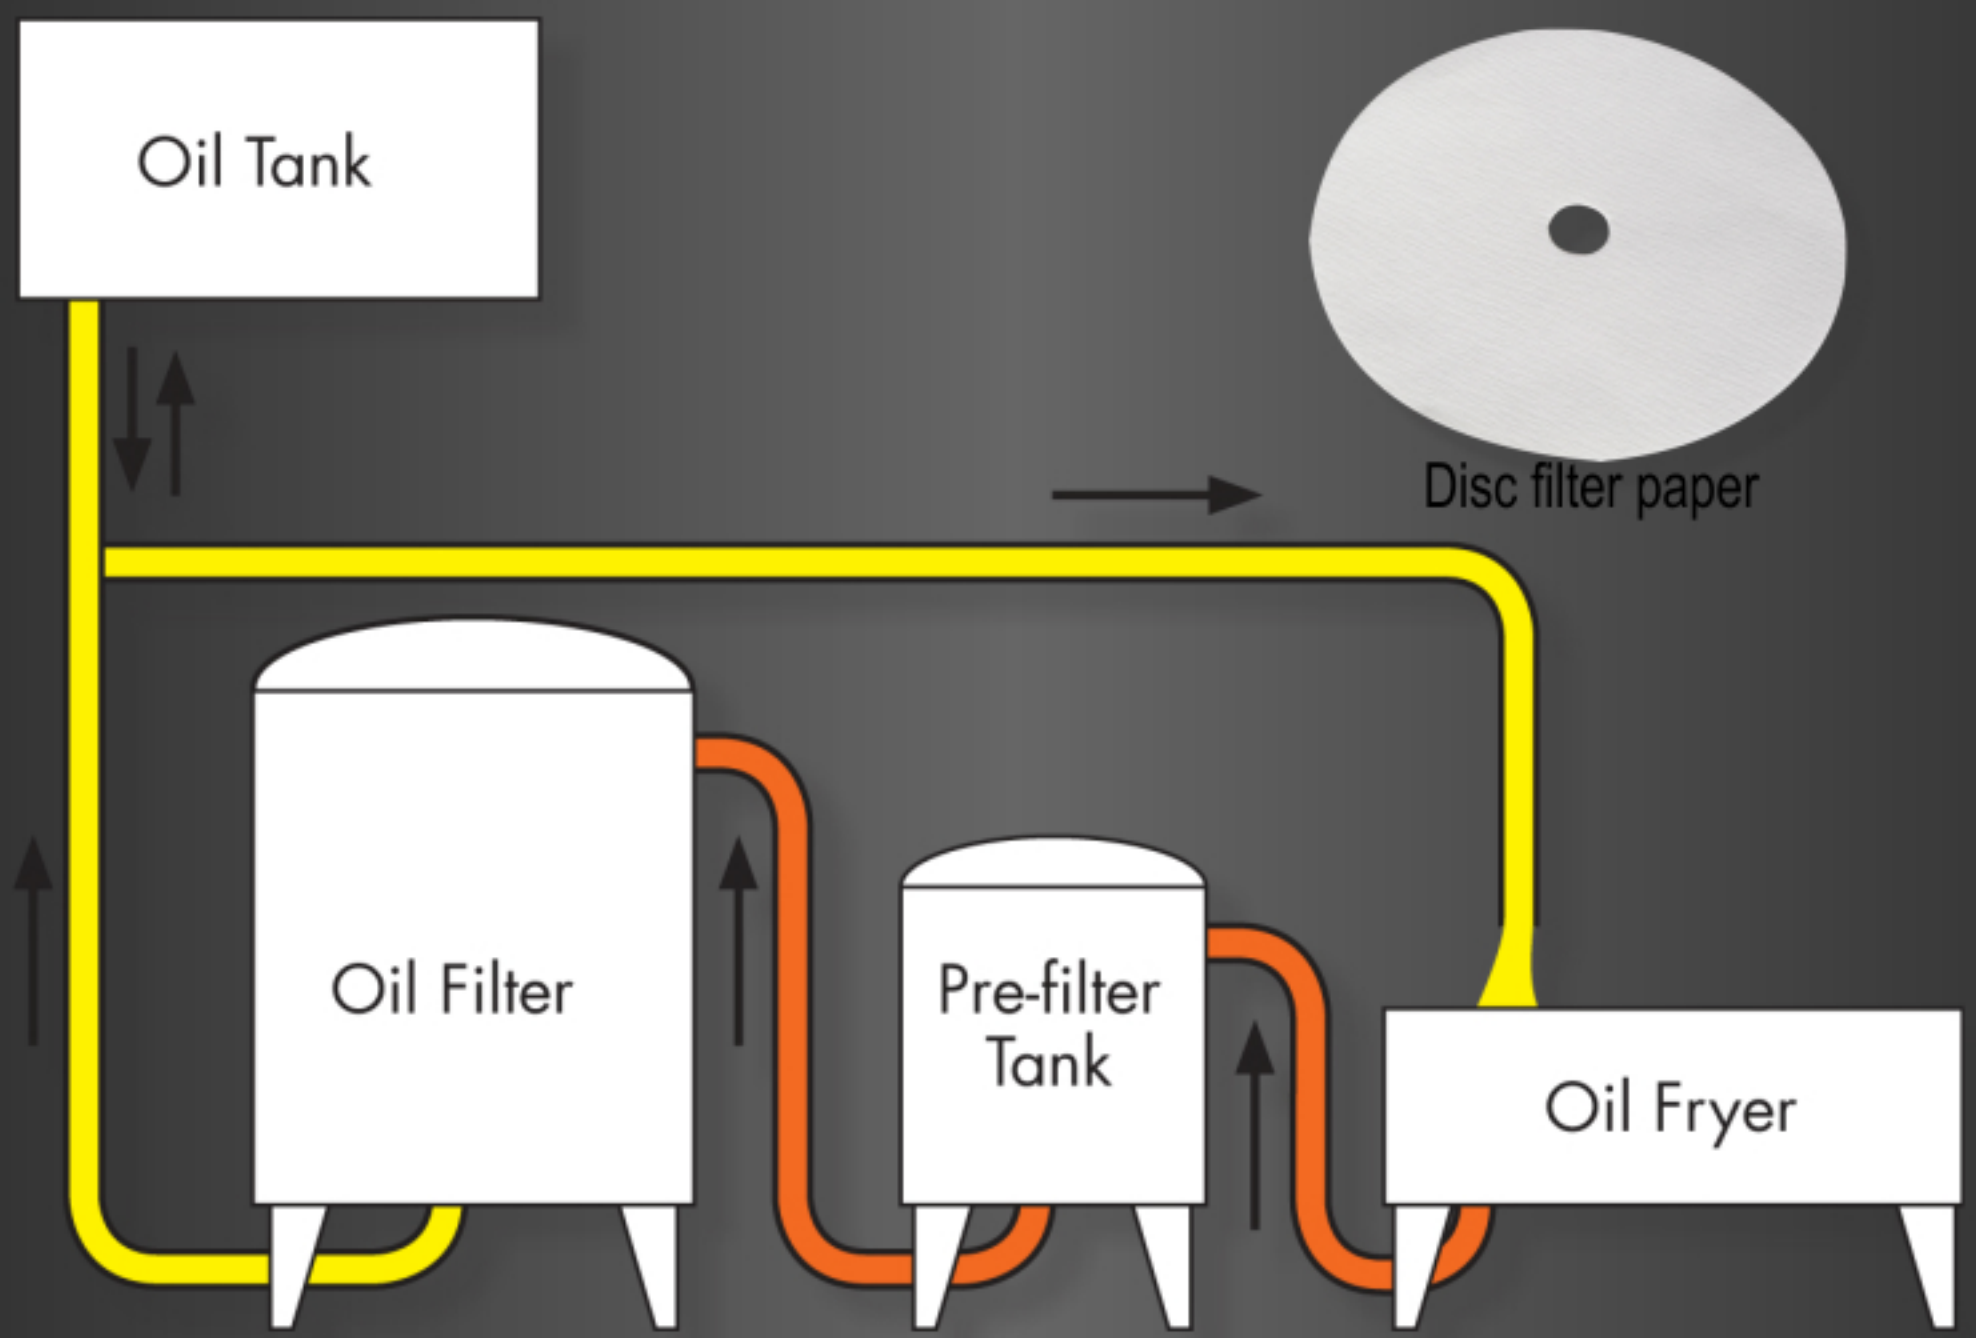

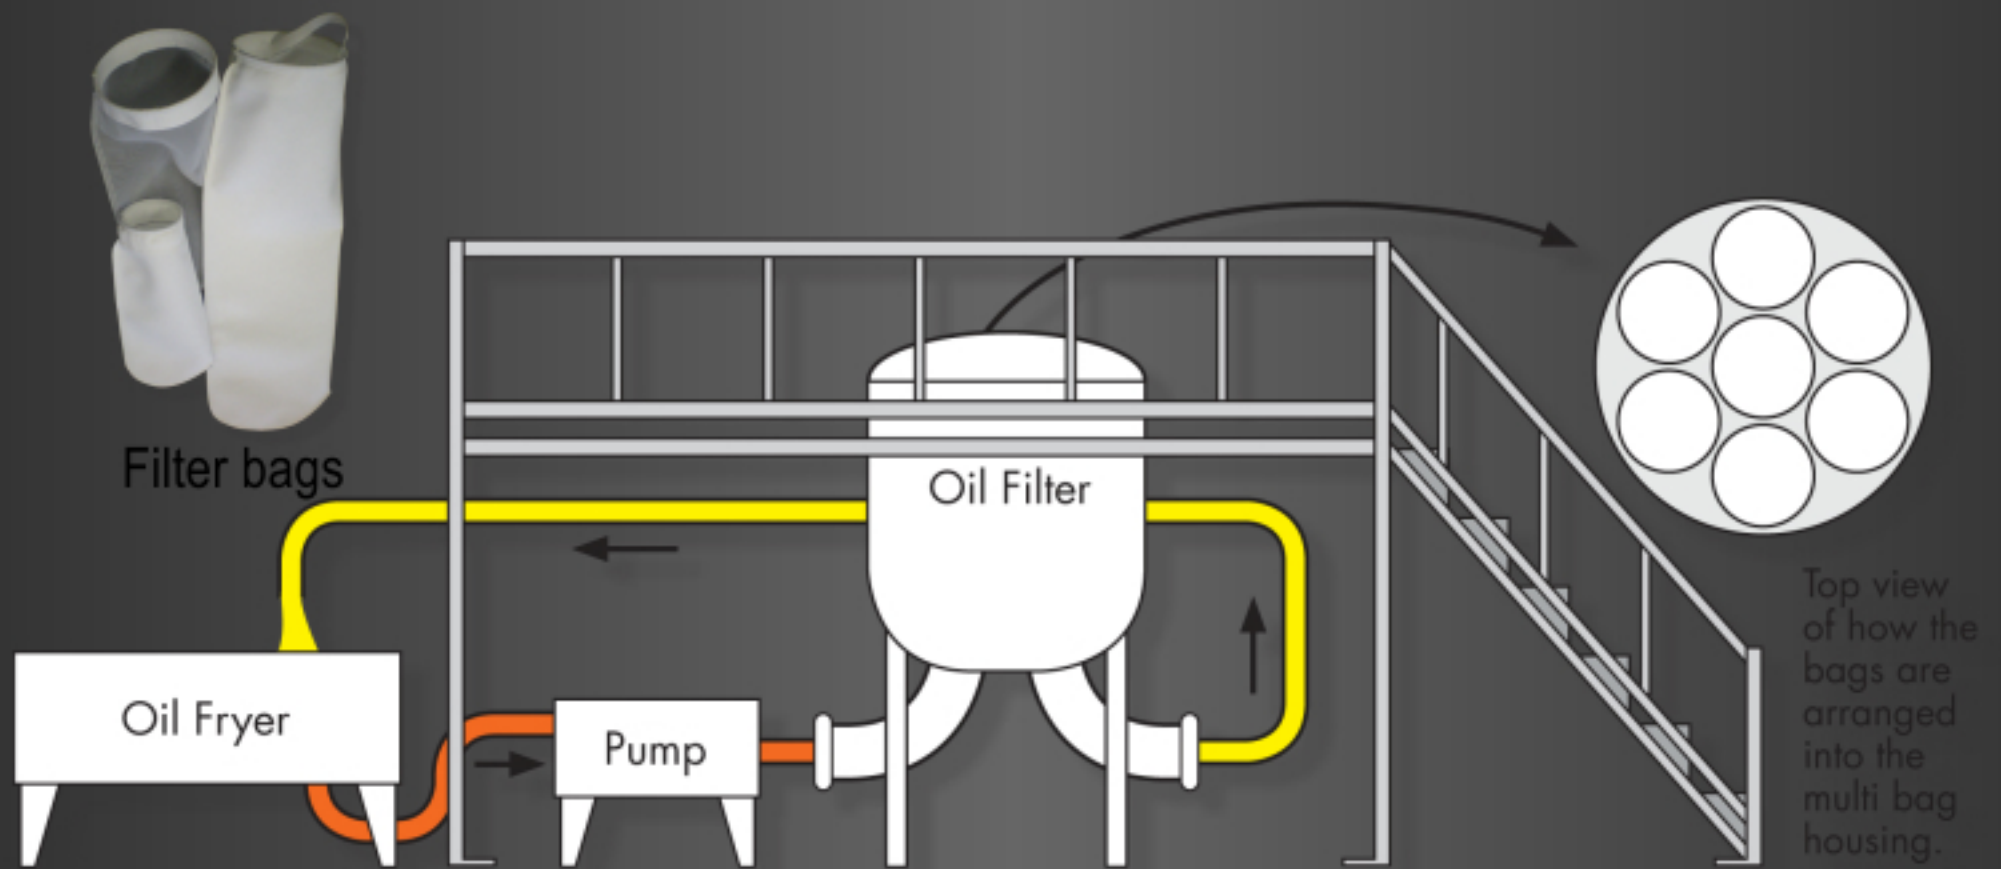

Industrial oil filtering

Disc filter paper method

Use with Miracle filter paper and further reduce FFA's (acidity) and TPM (total polar compounds).

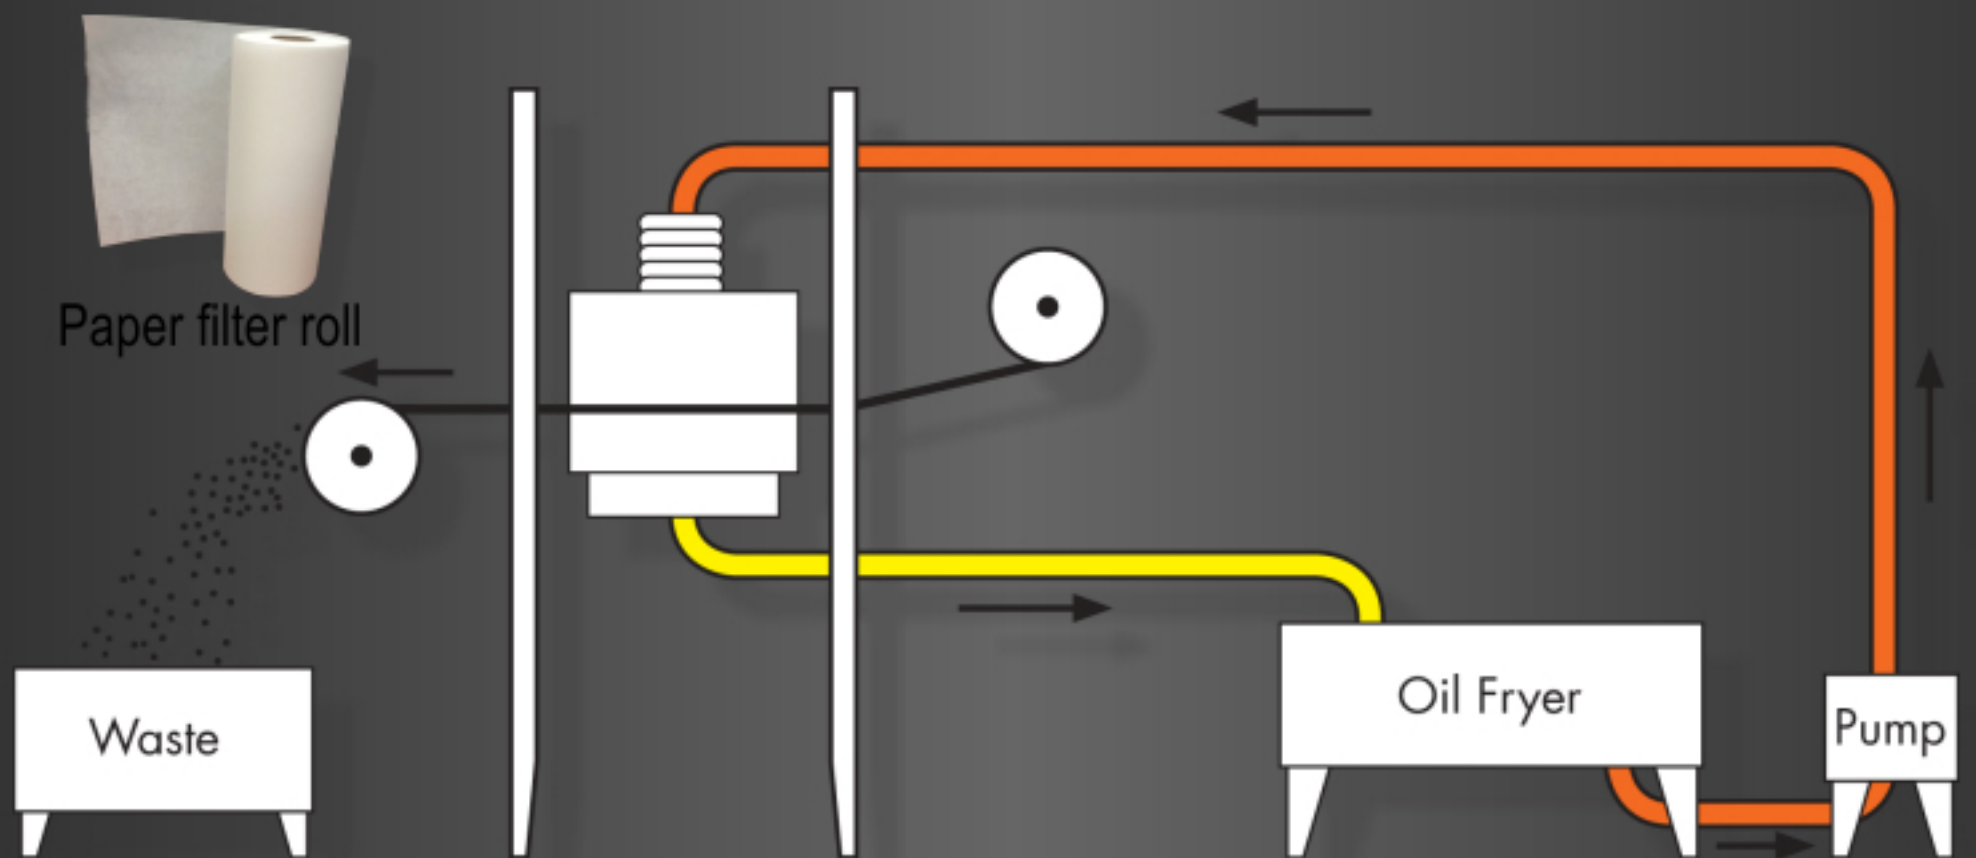

Filter bag method

Housings range between 600mm to 1200mm and is a multibag housing as pictured. Housing can be provided in custom-built observation platforms. This filtering method can be built in single (as illustrated) duplex or triplex systems.

Roll paper method

Custom covers

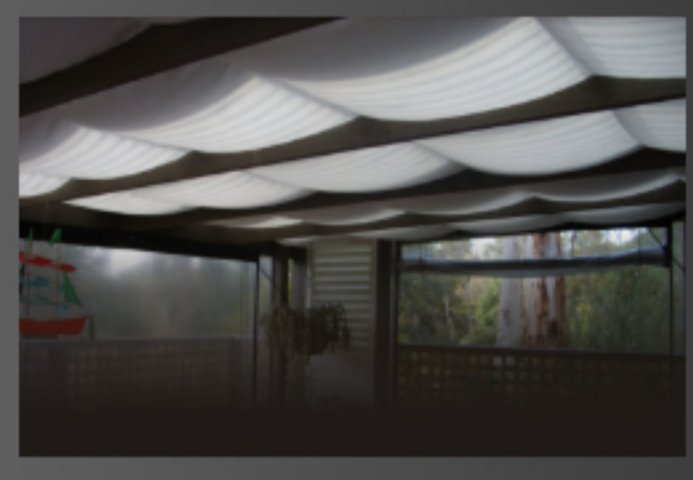

Consider our factory as your factory.

Allow us to help you design and manufacture.
 Our skilled team will assist you.
 We have a comprehensive range of felts, foams, vinyls, belts, buckles and more.
 Use our cutting and slitting benches and our wide range of stitching and tubing lines.
 In some cases we can coat fabrics with water protection.
 We can design and manufacture any type of product. We have helped design items including protective covers for LCD/plasma screens, barbeque covers, waste disposal and spill products, compose bins, laundry bags, post bags, just about anything you need.
